Codeforces Round # 640 (Div. 4)

By MikeMirzayanov, 25 hours ago, 25, 2

Hello Codeforces!

Yes, it is not a mistake I decided to run the first Div. 4 round: Codeforces Round #640 (Div. 4)! It starts on Saturday, May 9, 2020 at 11:35^{UTC-3}.

I want to be absolutely, completely sure that everything works as it should before the start of a Div.1 / Div.2 round. So I decided to do such an experiment. Since I am the writer of all problems in the round, in any case, no writer will suffer during the experiment.

Register Now -

As you noticed, recently the number of participants has increased dramatically. On the one hand, the number of gray and green participants in total exceeds the number of other participants. On the other hand in typical div.2 rounds, gray and green participants rarely can solve more than 2 problems. I remember that when I myself participated in the competitions, then every solved problem pleased and motivated (hello, endorphins!)

As an experiment, I plan to hold the first round for participants with ratings up to 1400 (and for unrated participants). The format of the event will be identical to Div. 3 rounds:

5-8 tasks:
